Checking the ROPS Structure

⚠ WARNING

You could be killed or seriously injured if you operate a machine with a damaged or missing ROPS/FOPS. If the Roll Over Protection Structure (ROPS)/Falling Objects Protection Structure (FOPS) has been in an accident, do not use the machine until the structure has been renewed. Modifications and repairs that are not approved by the manufacturer may be dangerous and will invalidate the ROPS/FOPS certification.

INT-3-1-8_8

Check the structure for damage.

Check that the four mounting bolts are installed and undamaged. Check that torque tightness of nuts **A** and **B** is correct (see table below). Tighten them to the correct torque if necessary.

Zinc-Plated Fasteners (colour: golden)

Nm	Kgf m	lbf ft
375	38	277

Dacromet Fasteners (colour: mottled silver)

Nm	Kgf m	lbf ft
365	37	269
