MAINTENANCE SAFETY

WARNING

Instructions are necessary before operating or servicing machine. Read and understand the Operation & Maintenance Manual, Operator's Handbook and signs (decals) on machine. Follow warnings and instructions in the manuals when making repairs, adjustments or servicing. Check for correct function after adjustments, repairs or service. Untrained operators and failure to follow instructions can cause injury or death.

W-2003-0903

Safety Alert Symbol: This symbol with a warning statement, means: "Warning, be alert! Your safety is involved!" Carefully read the message that follows.

Never service the Bobcat Skid-Steer Loader without instructions.

Use the correct procedure to lift or lower operator cab.

Cleaning and maintenance are required daily.

Have good ventilation when welding or grinding painted parts.

Wear dust mask when grinding painted parts. Toxic dust and gas can be produced.

Avoid exhaust fume leaks which can kill without warning. Exhaust system must be tightly sealed.

Disconnecting or loosening any hydraulic tubeline, hose, fitting, component or a part failure can cause lift arms to drop. Do not go under lift arms when raised unless supported by an approved lift arm support device. Replace it if damaged.

Never work on loader with lift arms up unless lift arms are held by an approved lift arm support device. Replace if damaged.

Never modify equipment or add attachments not approved by Bobcat Company.

Stop, cool and clean engine of flammable materials before checking fluids.

Never service or adjust loader with the engine running unless instructed to do so in the manual.

Avoid contact with leaking hydraulic fluid or diesel fuel under pressure. It can penetrate the skin or eyes.

Never fill fuel tank with engine running, while smoking or when near open flame.

Keep body, jewelry and clothing away from moving parts, electrical contact, hot parts and exhaust.

Wear eye protection to guard from battery acid, compressed springs, fluids under pressure and flying debris when engines are running or tools are used. Use eye protection approved for type of welding.

Keep rear door closed except for service. Close and latch door before operating the loader.

Lead-acid batteries produce flammable and explosive gases.

Keep arcs, sparks, flames and lighted tobacco away from batteries.

Batteries contain acid which burns eyes or skin on contact. Wear protective clothing. If acid contacts body, flush well with water. For eye contact flush well and get immediate medical attention.

Maintenance procedures which are given in the Operation & Maintenance Manual can be performed by the owner/operator without any specific technical training. Maintenance procedures which are **not** in the Operation & Maintenance Manual must be performed **ONLY BY QUALIFIED BOBCAT SERVICE PERSONNEL**. Always use genuine Bobcat replacement parts. The Service Safety Training Course is available from your Bobcat dealer.

Bobcat®

FORWARD

This manual gives instructions for:

1. Correct service and adjustment of the Bobcat Loader.
2. Overhaul instructions of the engine, loader hydraulic/hydrostatic system and mainframe parts.

See the Owner's Manual for operating instructions (Starting Procedure, Regular Checks, Basic Maintenance, etc.).

Make a complete inspection of these items after completion of service or repair:

1. Check the hydraulic fluid level, engine oil level, fuel supply, and coolant level.
2. Look for any sign of fuel, oil or hydraulic fluid leaks.
3. Complete lubrication of the machine.
4. Check the battery condition, electrolyte level and cables.
5. Check the air cleaner system for damage or leaks. Check the element and replace if necessary.
6. Check the electrical system.
7. Check the warning lamps.
8. Check the tires for wear and correct pressure.
9. Check the Bob-Tach attachment for condition. Check the wedges for damage or wear.
10. Check all safety items for condition (Operator Enclosure, Seat Belt, Safety Treads, Lamps, Parking Brake, etc.).
11. Make a visual inspection for loose or broken parts or connections.
12. Operate the loader, and check operation of drive system and hydraulic system.

Tell the owner if any of the above items are in need of repair.
