Section 10 - GENERAL

- Group 05 - Safety
- Group 10 - Specifications
- Group 15 - General Information
- Group 20 - Lubricants

Section 20 - POWER TRAIN

- Group 05 - General Information
- Group 10 - Driveline Malfunctions
- Group 15 - Driveline Repair
- Group 20 - Tongue Drive Shaft
- Group 25 - Belt Drives
- Group 30 - Hitch, Tongue, and Platform Gear Cases
- Group 35 - Cutterbar-Conditioner Gear Case
- Group 40 - Roll Drive Gear Case (Roll Machine)

Section 30 - CUTTING COMPONENTS

- Group 05 - General Information
- Group 10 - Diagnosing Malfunctions
- Group 15 - Cutterbar Assembly
- Group 20 - Disks and Knives

Section 40 - PLATFORM

- Group 05 - General Information
- Group 10 - Platform Repair

Section 50 - CONDITIONER

- Group 05 - General Information
- Group 10 - Diagnosing Malfunctions
- Group 15 - Roll Arms and Bearings
- Group 20 - Rolls
- Group 25 - Impeller

Section 60 - CARRIER FRAME AND TONGUE

- Group 05 - General Information
- Group 10 - Diagnosing Malfunctions
- Group 15 - Carrier Frame
- Group 20 - Tongue

Section 70 - HYDRAULICS

- Group 05 - General Information
- Group 10 - Diagnosing Malfunctions
- Group 15 - Lift Cylinders
- Group 20 - Swing Cylinder
- Group 25 - Tilt Cylinder (Top Link)

Section 80 - MISCELLANEOUS

- Group 05 - Wheels and Wheel Support Assembly
- Group 10 - Electrical Repair

Section 99 - DEALER FABRICATED TOOLS

- Group 05 - Dealer Fabricated Tools

Foreword

This manual is written for an experienced technician. Essential tools required in performing certain service work are identified in this manual and are recommended for use.

Live with safety: Read the safety messages in the introduction of this manual and the cautions presented throughout the text of the manual.

**CAUTION:**

This is the safety-alert symbol. When you see this symbol on the machine or in this manual, be alert to the potential for personal injury.

Technical manuals are divided in two parts: repair and operation and tests. Repair sections tell how to repair the components. Operation and tests sections help you identify the majority of routine failures quickly.

Information is organized in groups for the various components requiring service instruction. At the beginning of each group are summary listings of all applicable essential tools, service equipment and tools, other materials needed to do the job, service parts kits, specifications, wear tolerances, and torque values.

Technical Manuals are concise guides for specific machines. They are on-the-job guides containing only the vital information needed for diagnosis, analysis, testing, and repair.

Fundamental service information is available from other sources covering basic theory of operation, fundamentals of troubleshooting, general maintenance, and basic type of failures and their causes.

Thank you very much
for your reading.
