- L** Make sure that the throttle position sensor lead coupler does not go outside the chassis.
- M** Fasten the throttle position sensor lead.
- N** Fasten the neutral switch lead on the oil hose with a plastic locking tie and cut off the tie end.
- O** Fasten the neutral switch lead.
- P** Fasten the neutral switch lead and CDI magneto lead.
- Q** Pass the neutral switch lead, CDI magneto lead and radiator breather hose between the radiator and frame.
- R** Pass the carburetor breather hoses and overflow hose so that all these hoses do not contact the rear shock absorber.
